

**KRYPTAGLOW® LEADING THE WAY TO SAFETY
CERTIFIED FOR SAFETY EGRESS EVACUATION SYSTEMS
MEETS THE NEW IBC CODES 2009 -2010 & ASTM E2072 STANDARDS**

KRYPTAGLOW® SAFETY GLOW PAINTS are designed for professional use in industrial applications and for Egress Systems for evacuation, or anywhere Photoluminescent Paint is needed to light up dark areas. Kryptaglow® paints can be applied to walls, floors, metals, or on just about any properly prepared surface.

Last year, the International Code Council (ICC) approved two changes to its International Building Code (IBC) and its International Fire Code (IFC). The first requires pathway marking systems in new high-rise buildings and the second requires pathway marking systems in existing high-rise buildings. The requirements apply to the following occupancy types: assembly, business, education, institutional, mercantile, hotels and motels etc.

KRYPTAGLOW® meets the new codes that have been developed and are being enforced Such as ASTM E 2072, UL1994 and NFPA 101 elevating the standards for brightness for egress systems.

Kryptaglow® has paints for every professional use.

KRYPTAGLOW® is available in Latex Water base, Solvent base, Marine Epoxy, Acrylic Enamel, and Poly Urethane for vehicles. KRYPTAGLOW® is a system of 3 coatings. Proper application; White bottom coat, Kryptaglow® Safety paints, then Clear Top Coat

KRYPTAGLOW® SPECIAL BLEND MEA Paint Kit This paint passes all safety test for certification for new IBC Codes, UL 1994 and ASTM E 2072 standards and has the numbers to prove it. It comes in a kit which has ½ gal of bottom coat 1 gal of MEA paint and 1 quart of top coat to seal it. This is the very best money can buy and the brightest. It is the only top coated paint to pass the standards saving you money by protecting your investment and lasting for years. You can also make EXIT signs with the Special Blend System which pass UL1994 requirements.

KRYPTAGLOW® WHITE Base Coat We has formulated a White base coat for use with all Kryptaglow® Safety paints.

KRYPTAGLOW® TOP COAT Used for sealing any of our safety paints. It's specially formulated to absorb light and allow the fullest performance possible, and to work in combination with glow paints. Formulated for areas where fork lifts and heavy machinery are used. Comes in **KRYPTAGLOW® NON-SKID** as well

KRYPTAGLOW® MARINE There is always a need for tougher hard skin paint for machinery outdoors and area where moisture may be a factor. We currently have this paint made in our SUPER formula for an outstanding glowing effect. It will set in 3 hours

KRYPTAGLOW® PLASTIC DIP Formulated for dipping tools, handles, or any surface where a plastic glowing coating is needed. It can aid in preventing surface scratching between two metals.

KRYPTAGLOW® coatings have been used in applications for Marine, Aviation, and Military.
